Subject Fw: West Lake Landfill Proposed Plan - MDNR statement

I got this statement from DNR that they want inserted in the proposed plan. It looks OK to me.

Subject West Lake Landfill Proposed Plan - MDNR statement

Dan,

Here is the department's statement to include in the Proposed Plan:

The Missouri Department of Natural Resources is currently reviewing the proposed plan and, in general, supports remediation that will provide containment and isolation from human receptors and the environment, such as that proposed in Alternative L4 for OU1, Alternative F4 for the Buffer Zone and Alternative 2 for OU2. The department also recognizes the need for long-term care and monitoring and insists that a robust and durable stewardship plan be implemented to address this aspect. In order to achieve this, the State has applicable standards which are relevant and appropriate for

- closure and long-term care of all portions of the site,
- monitoring and control of gas generated in the waste deposits
- monitoring of groundwater, and
- continued removal of leachate from the formerly active sanitary landfill.

The department will formally recommend the State's preferred remedial alternative that will encompass all of these objectives following an evaluation of the public comments generated as part of the public comment period.
